We haven't been able to meet but the attorney keeps asking for a map of the area that we addressed during the Westbank Removal Action. I'll be next week for the Team Retreat but maybe you can work with this dB. I think a map that shows which address codes (or cities) that were removed may be a legend that shows the number of residences abated per zip code/city would work. I'm sure if you can pull this info out or not. The number of homes abated should be about 1450 as there are several dB entries included that were not abated. Please see if you can take a look and get the data out this file.
